8/12/17

Dear Board Members and Priceville Community Members,

I write this letter in support of the plan by the community league presidents to obtain turf equipment like the laser grading system, aerator, turf roller etc. for field upgrades. We would be delighted to match such a commitment with the commitment of our own of making the desired North Park field upgrades a priority. This commitment includes the use of my departments' resources (labor and budgetary funds). The goal would be to have baseball/softball infield projects (turf plaining, laser grading and SAF coat dispersal) completed before the 2018 season and the complete renovation of the large soccer field completed before the 2018 soccer season. We also would work closely with District 1 in removing the ditch (laying a culvert and filling in) from the football practice area so to be of better use. We would also would consent and work together with PCRA in hosting a variety of events, such as sports tournaments, car shows, festivals etc., intended to help recoup funds laid out for this plan. After projects are complete we commit to maintaining the equipment and the newly renovated fields so these upgrades can continue to be enjoyed by the community for years to come.

I appreciate your leadership and shared commitment to the youth of Priceville and Morgan County. Please feel free to ask me any questions or share any concerns you may have.

Sean Dailey

Director: Morgan County Parks and Recreation
